

A MOVEMENT HAS BEGUN IN NICARAGUA – THE 2ND POOREST NATION IN THE WESTERN HEMISPHERE

- The implementation started with training **15 Nicaraguan leaders committing to 4 days of classroom instruction** and getting certified to teach a program called LifePlan. www.LifePlanInstitute.com
- The pilot program began last November in and around Managua where **49 teenagers started meeting weekly to experience the program.**
- The teenagers and leaders have exceeded expectations by forming communities where **teenagers feel safe, have gained confidence to speak about things that are normally not discussed in the culture and are dreaming about how to use their God given talents in the future.**
- The teenagers have learned **the universal four epidemics** that could take them off the course to their dreams if they are not careful: **Dropping out of school, Drugs and Alcohol, Gangs, Teenage Pregnancy.**
- **Lifeplan graduation and Leader certification will take place on April 24th.** We look forward to celebrating the good work and progress that has been made.

GRACIAS for helping us start a movement that will continue to build. We hope you enjoy the letter from the leaders and teenagers sponsored from the donation that you made last year.
